INTRODUCTION

The 'Statistical Abstract, Tripura—1964' is the fifth issue in the series. Like the previous issues, the present issue fulfils the need of making available comprehensive and detailed information relating to the various spheres of social and economic activities in the state. Data relating to the years 1954 to 1964 have been incorporated in the Abstract, except in few cases in which the figures for the earlier years were not available.

The various sections of the Abstract are preceded by brief explanatory notes which are intended to be read in conjunction with the tables. The primary sources of data are indicated at the foot of each table.

The Statistical Department is grateful to the various Departments and Non-Governmental Organisations which have co-operated in bringing out this publication.

11. CLIMATE

Tables relating to rainfall, temperature and humidity are shown in this section.

TABLE NO. 2.1—In this table, actual rainfall of different centres, with the average figure in respect of the territory as a whole for the years from 1954 to 1964 is presented. Actual annual rainfall is given in centimetres. Normal rainfall of each station with variations of actual from the normal is also given.

TABLE NO. 2.2—This table gives monthly and annual rainfall during 1964 with percentage of variation from normal in respect of each centre.

TABLE NO. 2.3—In this table, data on temperature and humidity of Agartala are presented. Highest or lowest temperature on a particular month or year means the highest or lowest temperature recorded in any day of that month or year. The mean temperature shown in this table is the simple arithmetic average of the period.
